Palghar, Maharashtra | +91 73786 71536 | mahekshaikh7123@gmail.com

[LinkedIn \(linkedin.com/in/mahekshaikh-b87067251\)](https://www.linkedin.com/in/mahekshaikh-b87067251/)

PROFESSIONAL SUMMARY

Highly skilled AI/ML Engineer and Full-Stack Developer specializing in building end-to-end web architectures, intelligent text analytics engines, and secure communication channels. Experienced in developing custom NLP classification frameworks, structuring automated data pipelines, and implementing secure full-stack software lifecycles. Proven ability to bridge the gap between predictive machine learning models and fluid, scalable web applications.

TECHNICAL SKILLS

AI & Machine Learning: Python (Pandas, NumPy, Scikit-Learn), Natural Language Processing (NLP), Supervised/Unsupervised Learning, Feature Modeling, Theoretical Knowledge of DL & LLMs.

Full-Stack & Web Development: MERN Stack (MongoDB, Express.js, React.js, Node.js), JavaScript, TypeScript, HTML5, CSS3, Web Sockets (Socket.io), Frontend Architecture, Web Design, REST API Integration.

Developer Tools & Infrastructure: Git, GitHub, Firebase (Hosting & Integration), Network Protocols.

PROFESSIONAL EXPERIENCE

Machine Learning Intern

Jul 2024 - Aug 2024

YBI Foundation

Online

- Engineered end-to-end data preprocessing pipelines and feature modeling frameworks utilizing Python to evaluate predictive models.
- Designed and fine-tuned foundational models for supervised and unsupervised algorithms, boosting analytical metric scoring accuracy.

Trainee

Jul 2025 - Aug 2025

Atos Prayas Foundation

Virar, Maharashtra

- Acquired hands-on expertise in network infrastructure security, threat analysis configuration, and robust digital risk evaluation frameworks.
- Evaluated configuration data and managed verification parameters to prevent operational software vulnerabilities.

Technical Intern

Aug 2022

The Intellect Technologies

Boisar, Maharashtra

- Integrated connected Internet of Things (IoT) hardware architectures, structuring streamlined cloud monitoring configurations for edge sensor feeds.
- Configured interactive environments using advanced hardware platforms, validating data transmission loops over remote cloud interfaces.

PUBLICATIONS

Cyber Bullying Detection and Alert System for School

Mar 2026

VIVA-Tech International Journal for Research and Innovation

ISSN: 2581-7280

- Co-authored research on 'CyberShield,' an AI text-classification system for campus safety, and presented its NLP methodology at the National Conference on Role of Engineers in Nation Building (2026).

CORE TECHNICAL PROJECTS

CyberShield - AI-Powered Safety Classification System | Python, NLP, Web

2025 - 2026

Architecture, Firebase Hosting

- Developed and deployed an intelligent web framework on Firebase to track and mitigate cyberbullying dynamics by processing text streams in educational environments.
- Integrated a personalized AI assistant chatbot directly into the platform to provide interactive user support and dashboard guidance.
- Utilized advanced NLP models to automatically classify, segment, and isolate high-risk textual patterns via targeted text analysis.

ShieldChat - Custom Real-Time Communication Hub & Dashboard | AI, MERN Stack,

2025 - 2026

Render, Socket.io

- Engineered and deployed a secure, scalable real-time messaging custom web application on Render, implementing an automated AI-based sentence rephrasing tool.
- Implemented End-to-End (E2E) Encryption protocols to secure in-transit chat messages and ensure absolute data privacy for platform communication.
- Integrated REST APIs and WebSocket synchronization components to manage live user status loops across an optimized document-database repository.

Commercial Industrial Platform | JavaScript, HTML5, CSS3, Component Modules

2025

- Designed and engineered a full-scale corporate web platform showcasing industrial storage pipeline configurations and repair architectures.
- Implemented fluid frontend routing structures and interactive component modules to optimize cross-platform responsive view rendering.

CERTIFICATIONS & ACHIEVEMENTS

- Completed 2-Days Python Hands-on Technical Workshop – Viva Institute of Technology
- NPTEL National Certification: Cyber Security & Privacy Essentials
- ICT Academy Advanced Professional Certification: Introduction to MongoDB Engine
- Infosys Springboard Track Certification: Modern Software Engineering Frameworks (React & Angular Architecture)

EDUCATION

Viva Institute of Technology

Graduated May 2026

Bachelor of Engineering in Computer Science (AI & ML)

Virar, Maharashtra

Theem College of Engineering
Diploma in Computer Engineering
Boisar, Maharashtra

Graduated Jun 2023
